# Andropenis Review

**Andropenis Review - Conclusion:** Yes it works. A vast majority of the feedback from consumers are positive. Andropenis is backed by a very nice money back guarantee: if you don't see gains after 2 months of using the extender, you get your money back. Highly recommended!

### **Is Andropenis a Scam?**

A search through the top 5 consumer complaints websites uncovered only one complaint - someone said that his andropenis device broke within the first week of use.

### **Pros**

The maker of Andropenis has designed the extender for ultimate comfort, which is THE most important quality in an extender because, let's face it: if it isn't comfortable, you're not going to be wearing it often enough to see gains. There are 3 parts that will work to cushion your penis to make wearing the extender more comfortable: the Androcomfort Band, which provides more contact area for your penis (spreading the pressure over a larger surface area to alleviate the discomfort); the Androtop, which cushions the Androcomfort Band to make it even more comfortable; and the Androring which is a foam ring you can slip on your penis to further cushion it. Keep in mind though that these soft parts are susceptible to wear and tear, so you should get the "comfort kit" which is a group of extra cushioning parts. If you get the "comfort kit" when you buy the extender it's cheaper than if you were to buy them separately later on.

The product has received good consumer comments, and has a very solid money back guarantee (full refund if no gains after using the extender for 2 months) to protect the consumer. The device meets international sanitary and quality standards for medical devices (please see the [Andropenis website](#) for details).

### **Cons**

None Found

### **Benefits (as stated on seller website)**

- Increase in length (up to 4 centimetres)
- Increase in girth (up to 1.5 centimetres)
- Correction of penile deviations (curved/bent penises –up to 40%)

### **How Does Andropenis Work?**

Andropenis uses the principle of traction to increase the size of the penis by applying pressure to it – the device stretches the penis and in the process the cells breakdown and multiply. Thus, there is an increase in the tissue mass, leading to a longer and wider penis. The process is safe and natural, seeing as it's the body's normal ability to grow and adapt that is being leveraged.

The principle of traction has been used for centuries by many cultures to elongate body parts like the ear-lobes, necks and lips. While these tribes used relatively crude implements for this purpose, Andropenis is a refined device that is based on sound science. It is vital to also know that urologist have been using traction devices for almost sixteen years.

The device should be worn for about 9 hours each day – not necessarily at one stretch. You can take breaks during this period. For example, you can rest every two hours (this is just a suggestion; you decide your rest period).

The Andropenis Gold uses a comfort strap arrangement, thus, it's more comfortable to wear for longer

periods...enabling you to achieve results faster.

### **What Actual Consumers Are Saying About the Andropenis**

*"I saved up and got an **Andropenis Gold**, the quality is rock solid and results aren't one inch overnight worthy, but the gains are steadily increasing..." - Actual Consumer Comment from ComplaintsBoard.com (note: the commenter was complaining about another brand of penis extender - he switched to Andropenis after a bad experience with another extender)*

*"I have been using Andropenis (same as Fastsized) for 3.5 months. I measured at 3 months and gained 1/2 inch." - Actual Consumer Comment from MatterOfSize Forum*

*"I've gained permanently 1.75" length and 1" girth since June 2005 through the use of the Andro Penis and (very occasionally) PowerJelq for exercises. I'm very pleased with these results. Try it, and you will be happy to see serious gains after 3-6 months usage" - Actual Consumer Comment from Sexualask.com*

*"I have to admit, I bought the extender mostly as a joke, but figured what the hell, it couldn't hurt to try. I can't believe the results! It really works! My girlfriend couldn't be happier. I really am longer and thicker than ever! My only regret is not ordering sooner. I support this product 100%!" - Actual Consumer Comment from Amazon*

*"I am on day 53 of special method, including adaptation period. I am currently stretching at 20.3cm, started with a personal size of 10.5. I have missed 2 or 3 add ons, every 3 days, as the pain of increasing was killing me. Have noticed a 0.75cm increase in length." - Actual Consumer Comment from the Andropenis Forum*

### **Purchasing Options**

There are 3 packages to choose from: The basic Androextender package, the Andropenis Gold package, and the Andropenis Gold Premium package. The basic Androextender package will come with everything you need to get gains. The Gold package includes everything in the basic Androextender package plus some replacement parts, and the Gold Premium package includes everything in the Gold package plus even more replacement parts. So which one should you choose? If you are sure you will be using your extender for a long time (i.e. for the next few years) then I suggest that you get the Gold or Gold Premium package, because parts will eventually become worn and need to be replaced, and ordering spare parts separately will cost a lot more than getting them as a package. On the other hand, if you're just starting out and you're not sure whether you'll be in penis enlargement for the long haul, or, if you simply can't afford the more advanced packages right now, then by all means get the basic Androextender package. It will have everything you need to get started and you can buy spare parts later when you're more certain you want to continue using the extender.

**No matter which of the following 3 packages you choose, it is STRONGLY suggested that you order the "Comfort Kit" to complement the extender.** Believe me when I tell you that comfort is THE most important criteria in choosing a penis extender. All extenders on the market work similarly, because they are all designed to use traction to extend the penis. How much you will gain will mostly depend on how much you'll be using your extender, and the more comfortable your extender is, the more you will wear it. It's that simple.

### **Seller**

AndroMedical, through the website [Andropenis.com](http://Andropenis.com)

### **Guarantee or Refund / Exchange Policy**

If you don't see any gains in penis size after **2 month** of using it, you get a full refund. Andropenis also comes with a 1-year manufacturer's guarantee.

## **Customer Support Available**

Phone, Email, 24/7 Live Chat
