Male Edge Review

Male Edge Review - Conclusion: Personally, I would sooner recommend other extenders (such as [Andropenis](#) or [Vimax](#)) before I would recommend Male Edge. The Male Edge is great in all aspects - good gains, comfortable to wear, great warranty and refund policy - but if it falls apart easily like what some guys are saying, then I'd rather go with a sturdier extender. However, if you want to give Male Edge a try, I won't stop you, because you'll be covered by the 2-year warranty (if it breaks) and the double refund guarantee (you get back twice the amount you pay if you don't see gains).

Is Male Edge a Scam?

No it isn't. A thorough search through consumer complaints websites shows no complaints filed against the product. Consumers are getting good gains with this extender as well, although some guys are complaining that the extender breaks easily.

Pros

Male Edge Extender was developed by the same company that came up with the Jes Extender over a decade ago, thus they have years of extensive experience in making male enhancement devices. Male Edge is an advancement over the former Jes – being more comfortable, effective and easier to use.

3 components combine to make the Male Edge comfortable to wear - the penis is strapped down with a rubber strap made of soft material, a protection pad foam fits around the penis to provide cushioning, and the cohesive gauze increases protection and the securing of the strap.

There's a user forum where you can ask pre-sales questions and also get support from the seller and other customers after you've purchased.

The seller offers a double your money back guarantee if you don't see results.

How Does Male Edge Work?

The body has a natural ability to expand and grow under pressure. This is the basic principle on which the device is built; it is the concept of traction being applied. It is a simple and effective method that has been clinically proven. When pressure is applied to the penile tissues...its cells divide and multiply... they break down and regenerate. This results in a longer and wider penis, because more tissues are formed. The device also works in correcting curved penises.

This is the same idea that some primitive tribes have used for ages to stretch certain body parts, such as the neck, lips and ear lobes. The result that Male Edge provides is permanent. It is proven to work when used consistently (for at least 4 hours each day), but it is advisable to use the device as often as possible, because the results are based on the frequency of usage. It can be worn while you're engaged in all your normal daytime activities and it's okay to sleep with it on.
